

INTRODUCTION OF SAFE CHEMICAL HANDLING AT WORKPLACE

INTRODUCTION

Safely managing the chemicals in your workplace is good for business and it is good for everyone. It will improve your employees' safety and health. It will potentially introduce cost savings, through more effective work practices such as correct storage, handling, use and disposal procedures. Potential harm to the environment will also

be reduced. This chemical safety guide is intended for small businesses. In particular, it provides guidance for completing your chemical risk assessment.

OBJECTIVE

This training aims to provide:

- Create a complete list of the chemicals in your workplace.
- Know where they are located, how much you have, how you are using them and who is potentially exposed to them.
- Know about the risks they pose.
- Check whether the necessary controls are in place.
- Identify corrective actions to be taken where controls are lacking.

MINIMUM REQUIREMENTS

- Diploma or Degree in Science or Engineering; OR
- Diploma or Degree in other disciplines, or other than Science and Engineering with 1 year experience; OR
- Certificates from Polytechnic or SKM with level 3; OR
- SPM with 3 years working experience in scheduled waste handling

Date: 9th April 2018

Venue:

UNIMAS City Campus
