

Kuching: A student from Faculty of Engineering, Department of Mechanical and Manufacturing won 1 medal at International Engineering Invention & Innovation Exhibition 2018 (i-ENVEX 18) held at Arau, Perlis. It was organized by Universiti Malaysia Perlis (UniMAP) and Malaysian Research & Innovation Society (MyRIS), supported by World Invention Intellectual Property Associations (WIIPA) and International Federation of Inventors Associations (IFIA).

This event which was held from 13-15th April 2018, is an international expo participated by more than 10 countries, including Indonesia, Vietnam, Thailand, Laos, Cambodia, Korea, Canada, Bangladesh, Philippines, Romania and etc. The innovative project which won Silver Award is an international collaborative research of UNIMAS with Tokai University, Kyokuto Die-casting Co Ltd and HICOM Die-casting Sdn Bhd.

There were more than 400 participants from numerous institutions of higher learning from all over the world which took part in this exhibition-cum-competition event. The student was participating under the class of Manufacturing Process & Machines and Equipment. Below shows a summarize detail for the innovative project being awarded.

No	Researchers	Topic	Achievement
1	Tan Ger Lian, Ir Dr Mohd Danial Ibrahim, Dr Lidyana binti Roslan, Dr Yuta Sunami, Mr Hitoshi Watanabe, Mr Mohd Rosli Mohd	HPDC for Complex and Small Structures using Magnesium Molten	Silver Award
